

# Prograin<sup>®</sup>

*A world of Soybean*

**Seed  
Guide  
2022**

**Western Canada**

Everyone knows Alain Létourneau, the businessman and owner of Prograin, but few know that he is still actively farming today. Don't look for Alain on beautiful days in May, he is out sowing Breeder seeds in his fields.

These varieties, which are currently in the last trial phase, will be next year's new varieties, once they have met the criteria of excellence set by Alain and the research team. It is a decisive step for future Prograin varieties.

**The Prograin team, a team that is totally dedicated to what really counts for you:**

- ✓ Value-added seeds, 100% adapted to your climate and your soil.
- ✓ Advice from experts who are passionate about agronomy, when you need it.
- ✓ Tools to maximize your profits, like the FIXX platform.

**Allow us to introduce  
Alain Létourneau,  
the producer.**

**Prograin®** partner in  
your profitability.

## Conventional Seeds

# First rate performance

## SIBERIA

2375 CHU (RM 00.2) HIGH PROTEIN

- Well adapted and very high performing in early maturing zones
- Slender plant with average – above average height
- Offers above average standability
- IP variety offered with a full production buyback program

### Management Pointers

- Responds well to high populations
- Best placement is narrow rows

Slender  
Medium-tall

- Phytophthora resistance: **Good field tolerance**
- Brown Stem Rot: **Susceptible**
- IDC: **1.7**
- SCN: **Susceptible**
- Pubescence color: **Tawny**
- Hilum color: **Yellow**
- Standability: 1 2 3 4 5 6 7 8 9
- Sclerotinia tolerance: 1 2 3 4 5 6 7 8 9
- Stability/adaptability: 1 2 3 4 5 6 7 8 9
- Vigour for no-till: 1 2 3 4 5 6 7 8 9

Early conventional variety with surprising performance!

## LISKA

2400 CHU (RM 00.3) HIGH PROTEIN

- An impressive looking plant all season long
- Adaptable to varying plant populations
- Excellent yield potential in its maturity group
- Extremely advantageous marketing program

### Management Pointers

- Best results when seeded at 22 in spacing or less
- Plant in highly fertile soils for optimal yield

Semi-bushy  
Medium-tall

- Phytophthora resistance: **No**
- Brown Stem Rot: **Susceptible**
- IDC: **1.9**
- SCN: **Susceptible**
- Pubescence color: **Brown**
- Hilum color: **Yellow**
- Standability: 1 2 3 4 5 6 7 8 9
- Sclerotinia tolerance: 1 2 3 4 5 6 7 8 9
- Stability/adaptability: 1 2 3 4 5 6 7 8 9
- Vigour for no-till: 1 2 3 4 5 6 7 8 9

An early season, high yielding variety that will impress!

## MAYA\*

2475 CHU (RM 00.6) HIGH PROTEIN

- High protein
- Vigorous plant, offers a great start in spring
- Robust stem, excellent standability
- Very profitable marketing program

### Management Pointers

- Adapted to all soil types
- Preferably 15 in spacing or less

Slightly slender  
Medium-short

- Phytophthora resistance: **No**
- Brown Stem Rot: **Susceptible**
- IDC: **1.6**
- SCN: **Sensitive**
- Pubescence color: **Light brown**
- Hilum color: **Yellow**
- Standability: 1 2 3 4 5 6 7 8 9
- Sclerotinia tolerance: 1 2 3 4 5 6 7 8 9
- Stability/adaptability: 1 2 3 4 5 6 7 8 9
- Vigour for no-till: 1 2 3 4 5 6 7 8 9

Performs well agronomically and financially in its maturity zone

## HANA

2550 CHU (RM 00.9) HIGH PROTEIN

- Slender, medium short plant
- Robust stem, excellent standability
- Variety well adapted to high populations
- Unsurpassed yield potential in its maturity group
- Extremely advantageous marketing program

### Management Pointers

- Best results when seeded at 22 in spacing or less
- 30 in row spacing in organic production only
- Sow in highly fertile soils for optimal yield

Slightly slender  
Medium-short

- Phytophthora resistance: **No**
- Brown Stem Rot: **Susceptible**
- IDC: **2.0**
- SCN: **Susceptible**
- Pubescence color: **Brown**
- Hilum color: **Yellow**
- Standability: 1 2 3 4 5 6 7 8 9
- Sclerotinia tolerance: 1 2 3 4 5 6 7 8 9
- Stability/adaptability: 1 2 3 4 5 6 7 8 9
- Vigour for no-till: 1 2 3 4 5 6 7 8 9

This hardy variety dominates agronomically and financially

*« The soy produced and exported by Prograin helps feed 26 million people around the globe. »*

## **Growing Prograin conventional soybeans means earning profits with a simple buyback program that offers these great advantages:**

- ✓ Industry leading premiums
- ✓ Full Production Buy Back
- ✓ Pride in producing top-quality soybeans for human consumption exported around the world

## **Here are the steps in growing IP Soybean with Prograin**

- ✓ Contact your dealer to choose the best variety for you
- ✓ Order Seed
- ✓ Sign production agreement – online or paper copy available
- ✓ Premiums are clearly identified – no surprise.
- ✓ Check markets through the Prograin Customer Center
- ✓ Growing IP soybeans gives you access to a secure customer center access where you can follow the Chicago Stock Exchange soybean prices. You will also have access to your profile, production agreements, etc. You can lock in prices by contacting the Prograin Procurement Dept
- ✓ Produce crop – maintain field records dates seeded, sprayed, and products used
- ✓ Harvest – maintain records
- ✓ Submit harvest sample for grading
- ✓ Deliver IP production to a local reception point – sell unpriced crop day of delivery
- ✓ 10-12 days later, the final payment from Prograin by cheque or direct deposit

## EVO E3\*

NEW

2250 CHU (RM 000.7)

- Good standability with medium height and slender plant type
- Well suited to early production regions in Western Canada

### Management Pointers

- Best results when seeded at 7 to 15 in spacing
- Responds best to higher populations

Ultra Early Enlist variety, provides the most herbicide options on the market!

Slender  
Medium-tall

- Phytophthora resistance: **Good field tolerance**
  - Brown Stem Rot: **N/A**
  - IDC: **1.9**
  - SCN: **Susceptible**
  - Pubescence color: **Grey**
  - Hilum color: **Brown**
- Standability  
1 2 3 4 5 6 7 8 9
- Sclerotinia tolerance  
1 2 3 4 5 6 7 8 9
- Stability/adaptability  
1 2 3 4 5 6 7 8 9
- Vigour for no-till  
1 2 3 4 5 6 7 8 9

## ELMO E3

2525 CHU (RM 00.7)

- Extremely high yield potential combined with stable performance
- Excellent vigor in the spring

### Management Pointers

- Well adapted to all soil types
- Best results when seeded at 15 to 22 in spacing
- Contains the SCN resistant Gene

Semi-bushy  
Tall

Enlist E3 variety to discover for even more flexibility in weed control!

- Phytophthora resistance: **Good field tolerance**
  - Brown Stem Rot: **N/A**
  - IDC: **1.7**
  - SCN: **Resistant**
  - Pubescence color: **Grey**
  - Hilum color: **Yellow**
- Standability  
1 2 3 4 5 6 7 8 9
- Sclerotinia tolerance  
1 2 3 4 5 6 7 8 9
- Stability/adaptability  
1 2 3 4 5 6 7 8 9
- Vigour for no-till  
1 2 3 4 5 6 7 8 9

Roundup

SOYBEANS

Consistency & performance:  
a winning formula

Exclusive innovations  
from Prograin

## TORRO R2

2300 CHU (RM 00.1)

- Tall plant with dark green foliage
- Excellent yield potential for its maturity
- Above-average standability
- Slender soybean type with narrow leaves
- Maintains good plant height and pod clearance, even under challenging/unfavourable environmental conditions

### Management Pointers

- Responds well to high population
- Better suited to planting in narrow rows
- Adaptive to challenging/unfavourable environmental conditions

Slender  
Tall

A very robust soybean that will provide exceptional yield!

- Phytophthora resistance: **Good field tolerance**
  - Brown Stem Rot: **N/A**
  - IDC: **1.8**
  - SCN: **Resistant**
  - Pubescence color: **Tawny**
  - Hilum color: **Black**
- Standability  
1 2 3 4 5 6 7 8 9
- Sclerotinia tolerance  
1 2 3 4 5 6 7 8 9
- Stability/adaptability  
1 2 3 4 5 6 7 8 9
- Vigour for no-till  
1 2 3 4 5 6 7 8 9

## Local research for promising results in your fields

*« Local research allows  
the varieties to adapt  
to the conditions  
in that area and not at the  
farmers' expense. »*

Britney Gilson,  
Western Canadian Research Coordinator

While developed at our Research Center, seeds are tested and grown in our Saskatchewan (Marquis, Melfort) and Manitoba (Oakville, Morden, Virden Boissevain and Niverville) test plots. We make sure varieties meet growers expectations on: IDC resistance, pods uniformity, pod clearance, lodging, early maturity and high return.

**PROGRAIN WORKS HARD  
AND TAKES PRIDE IN DEVELOPING  
SOYBEANS SPECIFICALLY  
FOR WESTERN CANADA.**

# FIXX

## Prograin's new price closing platform

**KEEP AN EYE ON YOUR  
PROFITABILITY, ANYTIME, ANYPLACE!**

Prograin's FIXX platform gives you an accurate overview of your marketing, without needing to talk with a representative. A simple and accessible platform that makes you the expert.

Set your own  
pricing objectives

Easily manage the sale  
of your harvest

Anticipate, track and optimize  
your revenues in real time

Maximize your profitability  
anytime, even when you are  
away from your computer

One technology,  
more possibilities

## FRESCO R2X

2275 CHU (RM 000.7)

- Medium/Short variety that stands well with great appearance
- Among the earliest maturing varieties on the market, well adapted to the short-season regions
- Good PRR field tolerance
- Excellent IDC tolerance and white mold tolerance

### Management Pointers

- Best results when seeded at 15 in spacing or less
- Target higher populations

### High performance, ultra-early maturing variety

- *Phytophthora* resistance: **Rps 1a, good field tolerance**
- Brown Stem Rot: **Susceptible**
- IDC: **1.8**
- SCN: **Resistant**
- Pubescence color: **Tawny**
- Hilum color: **Black**

### Standability

1 2 3 4 5 6 7 8 9

### Sclerotinia tolerance

1 2 3 4 5 6 7 8 9

### Stability/adaptability

1 2 3 4 5 6 7 8 9

### Vigour for no-till

1 2 3 4 5 6 7 8 9

## GECKO R2X\*

NEW

2225 CHU (RM 000.7)

- Ultra Early maturity with excellent yield potential for its maturity range
- Slender plant makes an excellent candidate for narrow rows (less than 15 in), responds well to high plant populations
- Excellent disease package Rps 1c and moderate resistance to white mould

### Management Pointers

- Best results when seeded at 15 in spacing or less
- Adaptable to many different soil types
- Responds best to higher populations

### A new ultra early rugged variety for the west

- *Phytophthora* resistance: **1c**
- Brown Stem Rot: **N/A**
- IDC: **1.8**
- SCN: **No**
- Pubescence color: **Tawny**
- Hilum color: **Brown**

### Standability

1 2 3 4 5 6 7 8 9

### Sclerotinia tolerance

1 2 3 4 5 6 7 8 9

### Stability/adaptability

1 2 3 4 5 6 7 8 9

### Vigour for no-till

1 2 3 4 5 6 7 8 9

## DEXTRO R2X\*

NEW

2350 CHU (RM 000.9)

- Excellent standability and very good consistency in various environments (western and eastern Canada).
- Good pod fill and head finish
- Best suited to 15 in row spacing or less

### Management Pointers

- Best results when seeded at 15 in spacing or less
- Best suited to high fertility environments
- Responds best to higher populations

### Strong yield and early maturity

- *Phytophthora* resistance: **1c**
- Brown Stem Rot: **N/A**
- IDC: **1.9**
- SCN: **Susceptible**
- Pubescence color: **Tawny**
- Hilum color: **Black**

### Standability

1 2 3 4 5 6 7 8 9

### Sclerotinia tolerance

1 2 3 4 5 6 7 8 9

### Stability/adaptability

1 2 3 4 5 6 7 8 9

### Vigour for no-till

1 2 3 4 5 6 7 8 9

NEW

MERINO R2X\*

2400 CHU (RM 00.4)

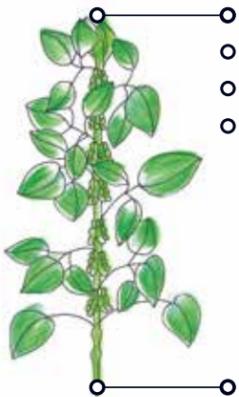

- Excellent yield potential for its maturity
- Mostly slender plant makes an excellent candidate for narrow rows (less than 15 in), responds well to high plant populations
- Excellent disease package, Rps 1k gene and SCN resistance

Management Pointers

- Best results when seeded at 15 in spacing or less
- Adaptable to many different soil types
- Responds best to higher populations

Early/Mid season maturity that fits across many areas of the prairies

○ Phytophthora resistance: 1c

○ Brown Stem Rot: N/A

○ IDC: 1.8

○ SCN: Resistant

○ Pubescence color: Tawny

○ Hilum color: Black

Standability

1 2 3 4 5 6 7 8 9

Sclerotinia tolerance

1 2 3 4 5 6 7 8 9

Stability/adaptability

1 2 3 4 5 6 7 8 9

Vigour for no-till

1 2 3 4 5 6 7 8 9

○ Slender Tall

KUDO R2X

2475 CHU (RM 00.6)

- Taller bushy variety that has great appearance in the field
- Great choice for heavier soils and wider rows
- Very strong IDC tolerance
- Good bushing capacity and excellent vigour

Management Pointers

- Best results when seeded at 15 in spacing or more
- Can adapt to lower populations

A strong variety for Manitoba with great yield on heavy soils

○ Phytophthora resistance: Good field tolerance

○ Brown Stem Rot: Resistant

○ IDC: 1.7

○ SCN: Suseptible

○ Pubescence color: Tawny

○ Hilum color: Black

Standability

1 2 3 4 5 6 7 8 9

Sclerotinia tolerance

1 2 3 4 5 6 7 8 9

Stability/adaptability

1 2 3 4 5 6 7 8 9

Vigour for no-till

1 2 3 4 5 6 7 8 9

○ Semi-bushy Tall

NEW

MAKO R2X\*

2425 CHU (RM 00.5)

- Strong mid season variety with excellent yield potential
- Semi-bush plant makes an excellent candidate for multiple row spacings
- Adaptable from 10 to 30 in spacing
- Rps 1c gene and excellent tolerance to white mold

Management Pointers

- Best results when seeded at 15 in spacing or less
- Adaptable to many different soil types
- Responds best to higher populations

A great new mid-season bean built for wide rows and big yield!

○ Phytophthora resistance: 1c

○ Brown Stem Rot: N/A

○ IDC: 1.8

○ SCN: Suseptible

○ Pubescence color: Grey

○ Hilum color: Grey

Standability

1 2 3 4 5 6 7 8 9

Sclerotinia tolerance

1 2 3 4 5 6 7 8 9

Stability/adaptability

1 2 3 4 5 6 7 8 9

Vigour for no-till

1 2 3 4 5 6 7 8 9

○ Semi-bushy Medium-Tall

MAO R2X

2500 CHU (RM 00.7)

- Extremely defensive
- Bushy, compact plant
- Robust stem, excellent standability
- Variety well adapted to average populations
- Unsurpassed yield potential in its maturity group

Management Pointers

- Best results when seeded at 15 in spacing or more
- 30 in rows will fill in quite aggressively
- Adaptable to many soil types

This ultra-high yielding variety is a proven winner!

○ Phytophthora resistance: Rps 1c

○ Brown Stem Rot: Susceptible

○ IDC: 1.8

○ SCN: Resistant

○ Pubescence color: Light tawny

○ Hilum color: Black

Standability

1 2 3 4 5 6 7 8 9

Sclerotinia tolerance

1 2 3 4 5 6 7 8 9

Stability/adaptability

1 2 3 4 5 6 7 8 9

Vigour for no-till

1 2 3 4 5 6 7 8 9

○ Bushy Medium-Tall

MIKADO R2X

2425 CHU (RM 00.4)

- Excellent standability
- Variety well adapted to average to above average populations
- Excellent yield potential in its maturity group
- Extremely rugged soybean with a maturity that fits a huge geography

Management Pointers

- Best results when seeded at 15 in spacing or less
- Plant in fertile soils for optimal yield
- Defensive characteristics allow this variety to be planted on all soils including tough ground

This extremely rugged mid-season soybean is ready for you!

○ Phytophthora resistance: Rps 1c

○ Brown Stem Rot: Resistant

○ IDC: 1.9

○ SCN: Suseptible

○ Pubescence color: Tawny

○ Hilum color: Black

Standability

1 2 3 4 5 6 7 8 9
