

# CROP REPORT #1

**Season start date:**  
May 1<sup>st</sup>, 2022  
**Period covered:**  
From May 1<sup>st</sup> to May 20<sup>th</sup>

| LOCATION             | RAIN                       | AVERAGE MAX          | CHU             |
|----------------------|----------------------------|----------------------|-----------------|
| Western Ontario 2021 | 10-20 mm / 1000 mm         | 17 °C                | 140-180 to date |
| Western Ontario 2022 | 30-40 mm / 1000 mm         | 19 °C                | 200-240 to date |
| RAIN AND             | AVERAGE MAX TEMPERATURE    | WEATHER FX ON PLANTS |                 |
| 30-40 mm             | 19 °C from May 1 to May 20 | 👍                    |                 |

## Crop Conditions

Spring started off wet which delayed planting of all crops. Soybeans started being planted as early as May 5<sup>th</sup> in some counties, but the majority of Western Ontario didn't start planting soybeans until the week of May 9<sup>th</sup> which is a later start than 2021. The soybeans are being planted into adequate moisture and germinating very quickly with high soil and air temperatures. At the start of this week there was only about 30% of soybeans planted but by May 20<sup>th</sup> I expect somewhere around 60% of the soybean crop to be planted in Western Ontario. The long-range weather
