## GLOBALLY

During the month of June, we received a lot of rain. Growers that didn't plant in May, we're only able to finish planting on June 25<sup>th</sup>, so we know say that all the planting is completed. Overall emergence is pretty good, there are a few exceptions on late planted field that received a lot of rain and in the fields where growers planted too deep. First flowers appeared in the last few days.

## DEVELOPMENT STAGE

Planting done May 10<sup>th</sup>, 2022....  
Pictures taken on June 28<sup>th</sup>, 2022...  
Demo trials with IP varieties
