

CROP REPORT #3

LOCATION	RAIN	AVERAGE TEMPERATURE	CHU
Eastern Ontario 2022	334.8 mm From May 1st	12.3 °C ave Min / 24.8 °C ave Max	2351 CHU / 2302 10Yr ave
Eastern Ontario 2021	266 mm From May 1st	12.9 °C ave Min / 24.9 °C ave Max	2303 CHU / 2263 10Yr ave
RAIN AND	AVERAGE TEMPERATURE	WEATHER FX ON PLANTS	
Good overall	24.8 °C		

GLOBALLY Soybean populations remain very good to excellent in Eastern Ontario and Mirabel areas. Plants are very well-developed reaching Stage R5 and row closures on wide row beans are obtained for the most part. There were attempts from some growers to double crop soybeans after Fall wheat but most of them abandoned the plan. Herbicide applications worked well for the most part with few resprays. Flowering on the plants is basically done except for late maturing varieties which are still putting some flowers on the top of plants. Moisture conditions and adequate currently.

DEVELOPMENT STAGE
