

CROP REPORT #4

LOCATION	RAIN	AVERAGE TEMPERATURE	CHU (Nicolet)
Québec Average	80 mm	18°C / 26°C	2958 / 3500
Saint-Hyacinthe, Québec 2021	122 mm	15.9°C / 25.9°C	2867 / 3500
RAIN AND	CHU AND AVERAGE	WEATHER FX ON PLANTS	
122 mm	2867 heat units - 20.9 °C	👍 or 👎	👍

GLOBALLY

Soybean got good conditions to help pod filing. No extreme temperature, we got average temperature, and we got more rain than usual in August. Yield lost can be seen in some fields because of all aphids and bean leaf beetle, we got during the month of august. All the damage made by the insects results by less pods by nodes and more aborted and deformed beans. In general, yield should be average of the last 5 year's harvest.
