

CROP REPORT #5

Season start date:
May 1st 2022
Period covered:
From May 1st to October 13th

LOCATION	RAIN	AVERAGE TEMPERATURE	CHU
Eastern Ontario 2022	487.3 mm From May 1st	5.7 °C / 18.2 °C	3286 CHU / 3299 10Yr ave
Eastern Ontario 2021	445.3mm From May 1st	10.0 °C / 21.0 °C	3400 CHU / 3284 10Yr ave
RAIN AND	AVERAGE TEMPERATURE	WEATHER FX ON PLANTS	
Good overall	16.2 °C	 or 	

GLOBALLY

Soybean harvesting is progressing very well but behind the last 2 years. The dry weather has helped harvest some very nice quality soybeans up to now. We did experience about 5 days of light frosts which has helped with the dry down of weed escapes. Around 50 to 70% of the soybeans are harvested and the last few days of rain will hold growers from harvesting a few days. Yields are extremely variable this year based on soil types, tillage practices and soybeans aphid presence not kept in check with insecticide treatments. The cold month of June shows up in overall lower yields.

DEVELOPMENT STAGE
