

CROP REPORT

Season start date:
April 25th, 2023
Period covered:
From July 1st to August 11th

LOCATION	RAIN	AVERAGE TEMPERATURE	CHU
Manitoba 2021	149 mm	25.1 °C	2425 CHU
Manitoba 2022	214.98 mm	24.4 °C	2356 CHU

GLOBALLY

Soybeans across Manitoba have had very inconsistent moisture. We had almost 2 weeks of unusually cool weather which allowed the crop some time to recover from the hot, dry weather we've had. Hot and dry weather continued through the last week of July and the first week of August with very spotty thundershowers. Most soybeans are looking for more moisture and we expect yields to be average to slightly below average.
