

CROP REPORT

Season start date:
May 1st 2023
Period covered:
From May 1st to Sept 15th

LOCATION	RAIN	AVERAGE TEMPERATURE	CHU
Western Ontario 2022	170-260 mm / 1000 mm	24 °C	2700-3000 to date
Western Ontario 2023	270-375 mm / 1000 mm	24 °C	2600-2900 to date

GLOBALLY

Overall the soybean crop looks good and we are starting to see fields mature. We are going to be at least a week later to start harvest compared to last year in most areas. Yield estimates look promising, some areas should see anywhere from 4-10bu/ac higher yields compared to last year. As long as there isn't an early frost or some other adverse weather conditions, we are on pace for a strong harvest season.

DEVELOPMENT STAGE
