

CROP REPORT #5

Season start date:
May 1st 2023
Period covered:
From May 1st to Oct 17th

| LOCATION | RAIN | AVERAGE TEMPERATURE | CHU |
|-----------------------|--------------------|---------------------|-------------------|
| Western Ontario, 2022 | 200-320 mm/1000 mm | 18 °C | 3100-3500 to date |
| Western Ontario, 2023 | 320-450 mm/1000 mm | 18 °C | 3000-3500 to date |

GLOBALLY

Harvest is approximately 60 % complete but there are some areas that have received significant rain in the past 2 weeks that are less than 40 % harvested. Yields have been strong ranging from 45-65bu/ac. Quality of IP soybeans have been good but the rain has caused people to wait for the crop to dry up again before going back in the field. We probably have a couple weeks remaining of harvest with rain still in the forecast.

DEVELOPMENT STAGE
