Season start date:

April 25th 2024

Period covered:

From April 25th to May 31th

LOCATION	RAIN	AVERAGE TEMPERATURE	CHU
Eastern Quebec 2023	23.9 mm / 1000 mm	27 °C / 4 °C	160 / 3300
Eastern Quebec 2024	91.8 mm / 1000 mm	24 °C / 2.5 °C	390 / 3300
RAIN AND	AVERAGE TEMPERATURE	WEATHER FX ON PLANTS	
310 mm	26,4 °C	👍	

GLOBALLY

In Quebec, growers started planting around May 15, and a bit later for Ontario, around May 20th. The third week of May, more than 60% of growers had completed the seedings. Seedings has been done in good conditions, soil temperature was over 10 degree Celsius. The temperature is favorable right now for good germination and rapid emergence. We got rain when needed, so the soil condition is excellent to bring enough moisture for the germination. Soybean should be out of the ground before the end of the month of May. We haven't had frosts in the last weeks, so it will ok for soybean emergence and the 14 days forecast will be warmer.
