

CROP REPORT

Season start date:
May 1st 2024
Period covered:
From May 1st to May 29th

LOCATION	RAIN	AVERAGE TEMPERATURE	CHU
Western Ontario 2023	30-40mm / 1000 mm	High: 19 °C Low: 5 °C	300-440 to date
Western Ontario 2024	70-100 / 1000 mm	High: 21 °C Low: 9 °C	450-540 to date

RAIN AND DROUGHT	AVERAGE TEMPERATURE	WEATHER FX ON PLANTS
Up to 100mm	High: 21 °C Low: 9 °C	

GLOBALLY

There is still only ~60 % of the soybean crop in Western ON that has been planted. There have been multiple rain delays since the beginning of May. Some areas have received over 100 mm of rain since May 1st. Fields that have been planted are emerging quickly due to abundant moisture and above average temperatures. I expect most of the soybean crop will be planted before June 10th with the current forecast which will still set us up nicely for a good soybean crop.

DEVELOPMENT STAGE
