

# CROP REPORT

Season start date:  
May 1<sup>st</sup> 2024  
Period covered:  
From May 1<sup>st</sup> to May 29<sup>th</sup>

LOCATION	RAIN	AVERAGE TEMPERATURE	CHU
Western Ontario, 2023	45-100 mm / 1000 mm	High: 23 °C Low: 11 °C	900-1100 to date
Western Ontario, 2024	160-210 mm / 1000 mm	High: 24 °C Low: 13 °C	1100-1250 to date
RAIN AND DROUGHT	AVERAGE TEMPERATURE	WEATHER FX ON PLANTS	
Up to 210+ mm	High: 24 °C Low: 13 °C		

## GLOBALLY

Planting went extremely late this year with the last acres being planted the week of June 17<sup>th</sup>. Earlier planted soybean fields are flowering but majority of fields still only have 4-5 trifoliates but should be flowering shortly after the long weekend. Overall fields look good with canopies starting to close the rows. Weed control has been great due to strong activation of pre-emerge herbicides. With continued wet and humid conditions, disease will be a concern heading into flowering.

## DEVELOPMENT STAGE
