

CROP REPORT

Season start date:
May 1st 2024
Period covered:
From May 1st to Aug 15th

LOCATION	RAIN	AVERAGE TEMPERATURE	CHU
Western Ontario 2023	215-300 mm / 1000 mm	High: 23 °C Low: 12 °C	1900-2200 to date
Western Ontario 2024	160-210 mm / 1000 mm	High: 25 °C Low: 14 °C	2150-2350 to date
RAIN AND	AVERAGE TEMPERATURE	WEATHER FX ON PLANTS	
Up to 210+ mm	High: 24 °C Low: 13 °C		

GLOBALLY

Earlier planted soybean fields are at R5 but later planted fields are still at R4. Most fields look good but fields with heavy soil types and poor drainage have some drowned out spots or areas with stunted plants. No major disease or insect pressure has shown up yet but with wet, humid conditions I expect white mould to be an issue in some fields. As much as it has been a wet year so far, we will need some more rain in August to push these pod fill stages along.

DEVELOPMENT STAGE
