RAIN AND DROUGHT	AVERAGE TEMPERATURE	WEATHER FX ON PLANTS	
35 mm	13.9 °C		

**GLOBALLY**

Planting has gone quite smoothly across the province. Soybean planting will be complete by May 31. Most of the province is relatively dry, however we’ve had enough moisture to give the crop a good start. Most fields are just emerging if they were planted at the beginning of May. (No pictures of emerged soybeans are available at this time)

**DEVELOPMENT STAGE**
